Tree

Lecture No. 05

By- Abhishek Sir

# Recap of Previous Lecture

Topic

Binary tree construction using traversal

Topic

Binary Search Tree

Topic

Topic

Topic

# Topics to be Covered

Topic

BST - traversal

Topic

special case for traversal

Topic

Search

Topic

Min, Max

Topic

Counting

## Topic : Binary Search Tree

Left Root Right

Inorder traversal

11, 24, 47, 50, 58, 60, 70, 75

Distinct key values

Increasing order Sequence

## Topic : Binary Search Tree

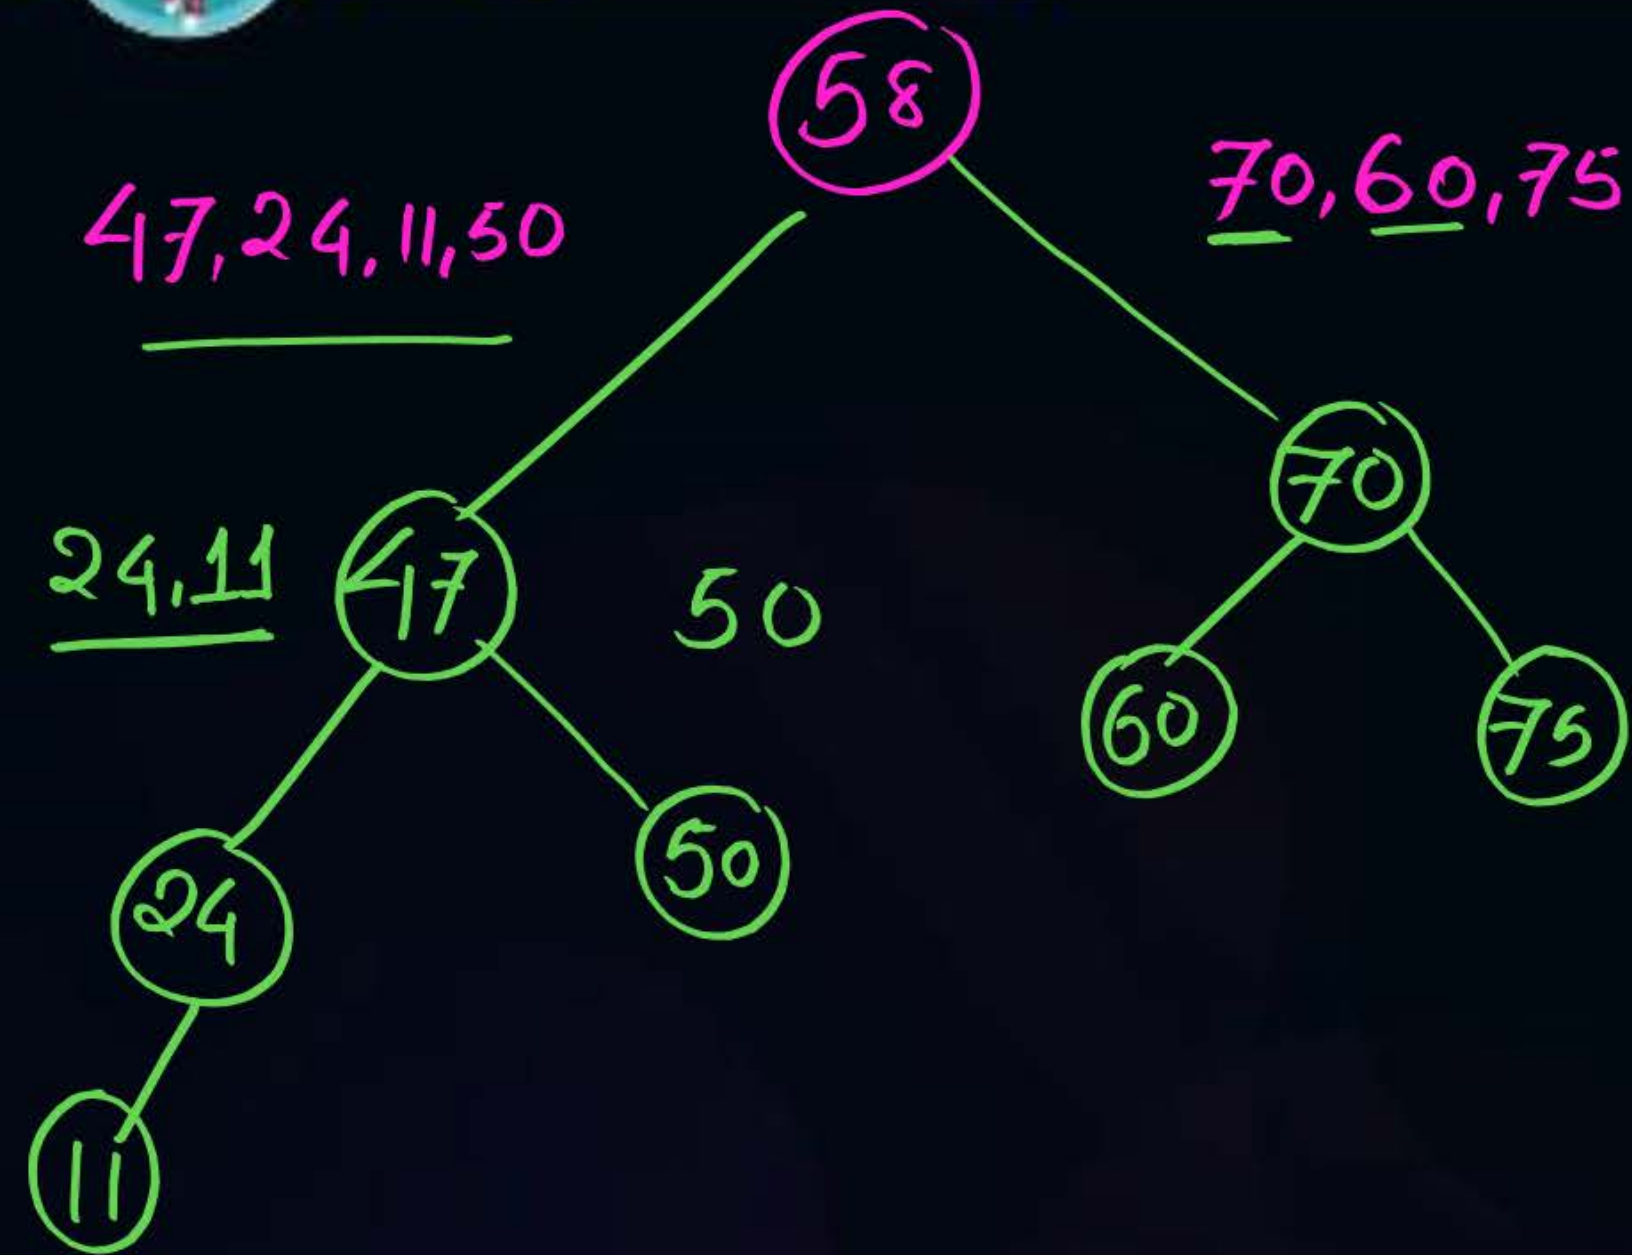

pre order (Root Left Right)

58, 47, 24, 11, 50, 70 60, 75

# Topic : Binary Search Tree

pre order ( Root Left Right )

58, 47, 24, 11, 50, 70, 60, 75

lesser key

greater

BST

only pre order we reconstruct the tree

## Topic : Binary Search Tree

Postorder (Left Right Root)

11, 24, 50, 47, 60, 75, 70, 58

## Topic : Binary Search Tree

Postorder (Left Right Root)

11, 24, 50, 47, 60, 75, 70, 58

Lesser key  
value

greater  
key value

## Topic : Binary Search Tree

Using only preorder & postorder we can  
uniquely construct the BST

2-ary tree (each Node having 0 or 2 children)

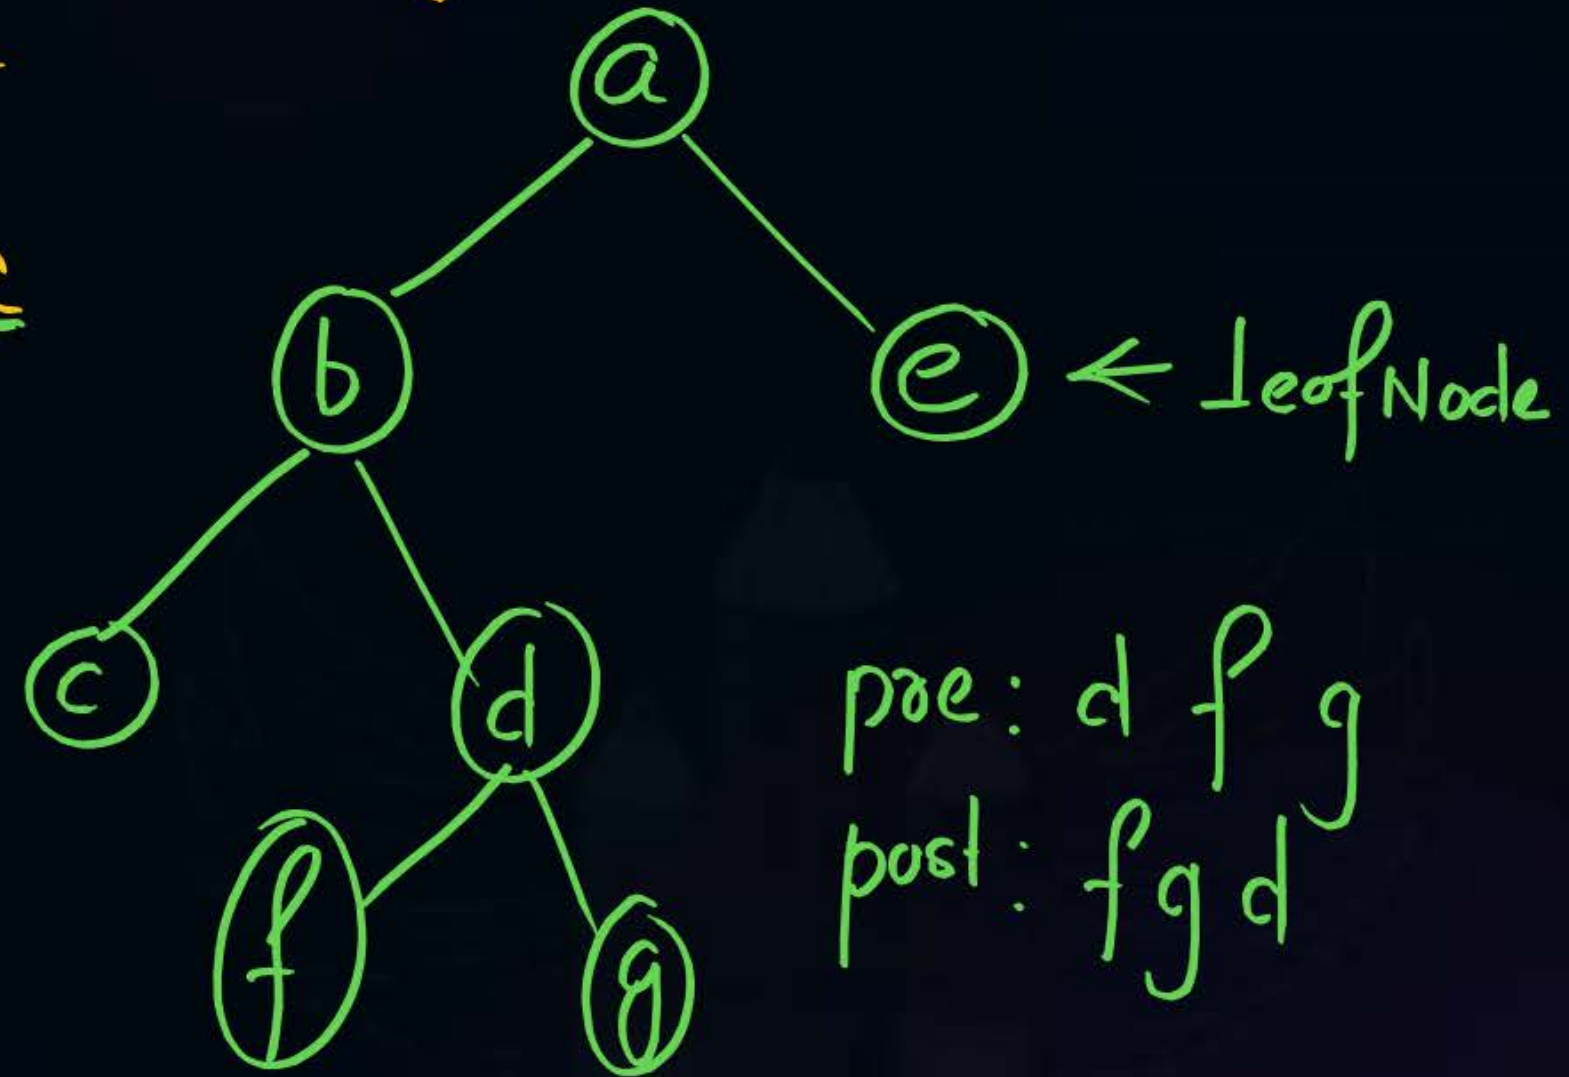

preorder      a | b c | d f | g | e

postorder      c | f | g | d | b | e | a

Left Right Root

pre: b | c | d | f | g

post: e | f | g | d | b

1. Identify the Root
2. The Node after root in preorder is Root of left subtree
3. The Node before root in postorder is root of right subtree
4. Identify the Node in left and right subtree using preorder

Start with root Node in left subtree and  
Skip all element till Root of right subtree is reached.

pre:  
1 | 2, | 3, 4, 6, 7, 5  
post:  
2, | 6, 7, 4, 5, 3, | 1

pre:  
1, 2, 3, 4, 6, 7, 5

post:  
2, 6, 7, 4, 5, 3, 1

## Topic : Binary Search Tree

```
int search(Tnode* t, int x) {
```

```
    if (t) {
```

```
        if (t->data == x)
```

```
            return 1; ✓
```

```
        else if (t->data < x)
```

```
            return search(t->right, x);
```

```
        else
```

```
            return search(t->left, x);
```

```
    } else  
    {  
        return -1;  
    }
```

## Topic : Binary Search Tree

```
int search(Tnode* t, int x) {  
    if (t) {  
        if (t->data == x)  
            return 1; ✓  
        else if (t->data < x)  
            return search(t->right, x);  
        else  
            return search(t->left, x);  
        } else  
        return -1;  
}
```

## Topic : Binary Search Tree

```
int min(Tnode *t) {
```

## Topic : Binary Search Tree

```
int min(Tnode *t) {
```

```
    if (t) {
```

```
        while (t->left != NULL)
```

```
            t = t->left;
```

```
        return t->data;
```

```
    }
```

```
    else {
```

```
        printf("Empty tree).
```

```
        return -1;
```

```
    } }
```

## Topic : Binary Search Tree

```
int max (Tnode* t) {  
    if (t) {  
        while (t->right != NULL)  
            t = t->right;  
        return t->data;  
    }  
    else {  
        printf ("empty tree")  
        return -1;  
    }  
}
```

## Topic : Binary Search Tree

Operation performed on Linked List depends upon length

Operation performed on BST depends upon

balanced BST  
 $O(\log n)$

= Height =  $O(h)$

## Topic : Binary Search Tree

32. The binary search tree shown below was constructed by inserting a sequence of items into an empty tree.

Which of the following input sequences will produce this binary search tree?

- (a) 5 3 4 9 12 7 8 6 20
- (b) 5 9 3 7 6 8 4 12 20
- (c) 5 9 7 3 8 12 6 4 20
- (d) 5 9 3 6 7 8 4 12 20

MSQ

Which of the following input sequence will produce this binary tree

(A) 5, 3, 4, 9, 12, 7, 8  
6, 20

(B) 5, 9, 3, 7, 6, 8  
4, 12, 20

(C) 5, 9, 7, 3, 8, 12, 6, 4, 20

(D) 5, 9, 3, 6, 7, 8, 4, 12, 20

## Topic : Binary Search Tree

MSQ Which of the following input sequence will produce this binary tree

☒ (A) 5, 3, 4, 9, 12, 7, 8  
6, 20

☐ (B) 5, 9, 3, 7, 6, 8  
4, 12, 20

☒ (C) 5, 9, 7, 3, 8, 12, 6, 4, 20

☒ (D) 5, 9, 3, 6, 7, 8, 4, 12, 20

## Topic : Binary Search Tree

MSQ

31. The Preorder traversal sequence of a binary search tree is 30, 20, 10, 15, 25, 23, 39, 35, 42.

Which one of the following is the not Post order traversal sequence of the same tree?

- (a) 10, 20, 15, 23, 25, 35, 42, 39, 30
- (b) 15, 10, 25, 23, 20, 42, 35, 39, 30
- (c) 15, 20, 10, 23, 25, 42, 35, 39, 30
- (d) 15, 10, 23, 25, 20, 35, 42, 39, 30

preorder

30, 20, 10, 15, 25, 23, 39, 35, 42

15, 10, 23, 25, 20, 35, 42, 39, 30

## 2 mins Summary

Topic

BST traversal
